Walk-Through Metal Detector

Made in the USA

## Easy Assembly

The *MS 3500* comes with a one-piece Detection Head and two side panels that can be assembled in minutes.

## Uniform Detection Coverage

The *MS 3500* uses microprocessor technology in the detection and con-

trol circuitry, which offers enhanced sensitivity in weapons screening. The unit also offers uniform coverage, from head to toe, for precise target evaluation. The *MS 3500* also features excellent sensitivity, stability and noise rejection for continuous, reliable screening.

## Audible and Visual Alarms

Ready Light indicates the unit is operational; Alarm light and audible alarm are activated when a target amount of metal is detected; LED bar graph indicates amplitude of the alarm signal.

**Regulatory Information:** The *MS 3500* meets U.S. and international regulatory requirements for electromagnetic safety. Extensive research has found no information that would indicate Garrett products have adverse effects on pregnancy, medical devices (such as pacemakers) or magnetic recording media. However, directives by physicians and medical device manufacturers regarding metal detectors should be followed.
